• (Black print) = Basic Target Analyte, i.e. its name and result will appear on our routine reports.

(•) (Black print) = Basic Target Analyte only if requested. There may be an additional charge.

•^z = Compound added to formal method target list. For example Vernolate is not listed in EPA SW846, method 8141B.

•^{x1} = Analyte not recommended for analysis by this method.

• (Gray print) = Formal method compound that MAI can analyze by special request. There is an extra set-up charge. Note that we have dropped 508.1 from our certification.

Note that most of these compounds are available from MAI by EPA 8270C. EPA 8082, which is detailed in the miscellaneous organics section, is also available for PCB arochlor & congener analysis.
