

# McC Campbell Analytical, Inc.

*"When Quality Counts"*

MAI Newsletter, July 2013

## **MAI is Proud to Announce Our NELAP Accreditation**

McC Campbell Analytical's accreditation is in recognition of successfully fulfilling the required standards set by the National Environmental Laboratory Accreditation Conference (NELAC), 2003 NELAC standards. We are very pleased to have demonstrated our technical and organizational competence in the field of environmental testing and to have successfully passed the very rigorous audit signifying our compliance with the highest standards of practice.

We are proud to have Christine Horn as the head of our QA/QC department. Our NELAP accreditation is largely due to her efforts. She is well known within the Bay Area environmental community and represents our commitment to excellence in both regulatory compliance and scientific rigor.

### **Other MAI capabilities/certifications that you may not be aware of:**

- HRGC-HRMS Dioxins & Dibenzofurans by EPA methods 1613 and 8290, as well as 2,3,7,8-TCDD by EPA 613
- Air: Soil Gas, Indoor Air, Light & Atmospheric Gases . Helium shroud available for rental
- TO17 (Gas, Diesel, & VOCs) using sorbent tubes. SKC low flow pump available for rental
- Pharmaceuticals & Personal Care Products analysis by LC-3Q
- SWAMP analytes by GC-3Q with very low sensitivities
- Pyrethrins & Pyrethroids testing to SWAMP's demanding sensitivities
- TPH & EPH Polar Fractionation
- Unregulated Contaminant Monitoring Rule 3 (UCMR3) testing available
- ISO/IEC17025
- Consumer Product Safety Commission (CPSC) certification
- Washington State Department of Ecology certification
- State of Alaska Department of Environmental Conservation certification
